

You are in the army now  
(episode six)

## TT agenda

- crime time table
  - with special respect to
    - reservation of conscience
    - defending the fatherland
    - civilized war forms
    - civilized war **enemies**
    - civilized war weapons

Soldiers, I wish a creative sunny morning!

Our last viewpoint from where we wanted to continue was on state secretaries as qualified active enemies.

Identified before were already the political class. Bases as passive, upper – mandated – class as active enemies.

Are there further enemies? This question is obvious because even state secretaries carry german passports and therefore we have so far only identified, including them, suicidal civilized war enemies who are a different calibre from Japanese suicide soldiers (kamikaze) in battle wars or suicide terror attackers who take their individual suicide into account for a comparably small group of collateral individual victims whereas our suicidal civilized war enemies only commit collective suicide under exclusion of their according individual suicide. So they can do it again and again. (Targets: whole skylines of NY LA Frisco, Washington D. C. et seqq. rather than only single twin or Trump towers (oops, Trump Tower still sleep standing ..., at least a considerable possible trump card in sleeves of the american civil population ... )

This is hard to imagine and therefore are always external terrestrial enemies (foreign governments) suspected and accused of aggression except for in the Alderaan case, where it was too late however, and Darth John Paul Vader the second and his giant death star had destroyed princess Lea's mother planet with one single total destructive laser shot already and the rebels had no mother Alderaan left to defend and ended up as universal guerrilla resistance like we might end up on space stations and rebel ship

earth-memorial-enterprise between mars and moon bases probably when life conditions on mother earth simply exclude humans one day.

We always ignore that, although maybe still growing, mankind is supposed to die off. Not only in the place taking way of suicidal genocides. Global warming is going to provide even globally for inhuman life conditions for instance if nothing substantial changes immediately (respectable scientists like Prof. Lesch, Munich, insist for long already on a fundamental civilisation restitution. Prof. Lesch, by the way, recognized too that mankind abolishes itself (in my words commits collective suicide)).

However, Earth humans did not learn from the destiny of their Alderaan sisters and brothers and have not yet recognized the real creators of the anonymous and invisible violence which surrounds them, are not aware of their true common e(x)ternal enemy.

Quite simple minded enemy pictures according to visible physical aggressions lead to wrong accusations and counter aggressions again and again among the wrong parties resulting in the classic vicious circle of more completely unnecessary international battle wars with soldier average age 19, na na na nine nineteen ... (none none of them receiving the hero's welcome ... (my dear recruits)).

Now peter, qualified (as) hard core victim, has eventually identified the real e(x)ternal enemy behind the anonymous violence of which Franz Kafka already warned indefatigably before during and even still after world war I until he died in 1924 but was first hermetically ignored like peter and then not understood, however, unlike peter today, back in (t)his point of time. peter learned from the Kafka case and writes clear text. Kafka wrote about a Metamorphosis (quite mystic) peter writes about ghost crimes like possession and ghostly instigation (quite clear and even illustrative reports narrations and true story novels). Nobody is going to believe me is what everybody else thought considering the genre and then chose fiction (phenomenon with John Travolta, the green mile, Japanese ghost in Connery's the cradle of the sun, Spielberg's poltergeist and so on ...), in order to tell their unbelievable stories nevertheless. However, peter does not tell them as book author, he tells them as uncompensated civilized war victim aiming both, his own rehabilitation as well as a termination of this e(x)ternal aggression. He proved nearly all of the provable facts. I do not doubt his credibility regarding the unprovable facts. And by the way, he can certainly prove more of his case facts when we open the PAAA for him as well as more of the mankind case when the Vatican archives are opened.

Celibate churchtianity is the real enemy of mankind.

Commander Münde and major Tom share peters analysis which in this respect includes all other species on mother Earth in the term mankind since they are always part of terrestrial populations.

This enemy attacks our globe now in the 202<sup>nd</sup> consecutive decade and desperately needs to be removed/dissolved.

The clerics are the hovering head enemies. However, their internal state affairs secretaries have external state affairs colleagues, UN accredited diplomats and foreign embassy staff. Both secretary types (that they rapport to the Vatican was proved lately again in "Das Amt" where you can read too that state secretary Ernst von Weizsäcker who had signed various concrete Jew deportation orders before he became german ambassador in the Vatican had hidden himself in the Vatican after the war before he could be arrested two years later and be convicted in Nürnberg as aggressor and criminal against humanity. However he got a sentence of five years prison only and was set free after three already in the course of a general amnesty. His son later became president of the FRG, which reminds me that we may under no circumstances forget Steinmeier including his presidential staff, former state secretary in the foreign ministry before becoming foreign minister himself and then president.) together are our qualified active enemies under them loads of active enemies in permanent state power enforcement staffs. Next to the legislative power executives (political class) the judicative and administrative power executives, under them first judges prosecutors and psychiatrists.

Hovering head enemies, however, are not inactive either, their activities are only invisible.

Before we continue here with this quite new dimension of invisibility I would like to summarize the preliminary results of our civilized enemy analysis which may then be complemented if incomplete.

Then we can eventually concentrate on the ultimate head enemy, the above everything hovering cleric, the only always only benefitting party, and its invisible methods of aggressive warfare described in peters "crime time table".

So far we forth developed our preliminary result and see that our around cologne platoons might prepare for arresting in addition to the upper political class in Düsseldorf the upper justice (judges and prosecutors) and administrative (public head psychiatrists, career and lifetime state servants) classes.

However, do not worry, career and life time state servants may be pleased to hear that they are going on to serve their homeland and its natural restitution interests until they are satisfied.

Now, soldiers, who would you think belong to the (to be identified) upper class and who to the state servants class base?

Soldier: "Hey teachers, leave us kids alone!" .... general ha ha ha ha ... .. "sorry to interrupt the amusement but I was not yet finished, ... we don't need no thought control. ... And I think head teachers who are university teachers and other professors at least belong to the upper class, major."

At least of the teacher subdivision, I would agree. However, if considerable as enemy in general or case (pallets) wise is here maybe more of a question. Prosecutors and judges have force competences (may apply means of immediate state force) and have in the german state under the law together with admitted lawyers (members of lawyer's chambers) the exclusive law care function. Admitted lawyers however do not have immediate state force competence. They are the unarmed minority of the three german law care organs and we did not generally count them as enemies although they fail as law care organs too due to their weaker position. However, single case (pallets or firm) wise (unbelievable huge court appointed insolvency administrators (like Görg) for example. I mean their partners (firm internal upper class)) some of them certainly qualify as active enemies too.

If we compare this to the upper teacher class the classification unarmed could rather result from research activities regarding areas of research interests and applied research methods (do they manipulate or observe only) than their teaching contents, unless taught are christian beliefs. However, teaching becomes critical with the applied methods too. The criminals abuse both parts of course, whether they contribute actively only to one part or both.

Let us leave this open here but realize that we have hopped from the justice ministry to the education ministry and could go on doing some more agency hopping. We covered already foreign relations and war. Now justice and education. There still are global logistics (civilized traffic with head command over german airbus shares including airbus defence and space and airbus military), homeland, family, treasury, modern slavery (labour), economy including energy and ecology and the mystery ministry (Kanzleramt) competent for mysterious special purpose operations and head command of german outbound secret services.

Very sensitive, eventually is the people brainwashing propaganda function which is delegated to the pm conference. However, it is quite difficult to identify head command within the federal government.

We would and probably will later have to decide these and similar questions regarding the state servants in every administrative sector.

For the initial compact defence operation, however, this might become too complex.

Major, why don't we simply arrest all constitutional organs in the run of the initial operation? This would include government and mps of Bund and Länder, constitutional judges of Bund and Länder and president Steinmeier. In addition I would arrest the general federal prosecutor, the general prosecutors of the Länder and the program directors and intendants of ARD and ZDF and only symbolic with regard to print press freedom Springer headquarters.

Another soldier: "What is about the prosecution deputies? Police certainly will be ordered to defend them. And what about police in general? Enemy or friend?"

I love our new HIVs! Quite reasonable combat plan and right concerns!

A third soldier: "What about their invisible services, major. You mentioned BND. What about inbound services. Verfassungsschutz and military Verfassungsschutz (MAD) spy on their own population and army. Shouldn't we collect the invisible services presidents too at least?"

Good point too. So all constitutional organs general prosecutors and secret service heads, program directors, intendants and private (print) press corporate executives as first compact defence operation. I only would favour SPIEGEL headquarters over Springer and encourage their investigative team to report the truth. Why did they not react on peters very reasonable recent help call in June 2019? Please read it here after class <http://familienzuechtigung.com/sites/default/files/pdf%20/emailanSPIEGELInvestigativteam.pdf> !

Regarding police a diligent analysis of their natural order chain is necessary. In general I consider them as another average cut of the population who are with us.

Major, but after this analysis do not forget the celibates. You promised to analyse their ultimate enemy quality. In case this is convincing I would at least the few german bishops and cardinals include into the initial move.

Oh you do not waste time soldiers. I probably would have come to this addition too. You are good and fast thinkers. Real conscious minds, Chapeau! Let us come back to this point after we have analysed their invisible activities and operating dimensions what we begin to do after lunch and siesta.

Back here in two hours, comrades, Enjoy your sweet sauerbraten, which is on the menu today, kitchen had let me know!

End of episode
